

SONNEMAN[®]
A WAY OF LIGHT

A WAY OF LIGHT

This catalog is a compendium of our design innovations,
including our 2019 introductions.

In addition, our **Suspenders® catalog Vol. 5** presents our
greatly expanded Suspenders system and new introductions.

Featured Product on Cover:

Intervals - Etched Bell w/Bell Reflector | Page 32

Illumination from the Art of Technology®

"Driven by our passion for innovation, the refinement and sophistication of these exciting modern lighting achievements reflect our architectural design sensibilities and our growing technological capabilities.

In pursuit of knowledge and growth in the skills of our craft, we continue to explore and expand the possibilities of modern lighting in pursuit of... Illumination from the Art of Technology."

-Robert Sonneman

SECTIONS BY CATEGORY

systems

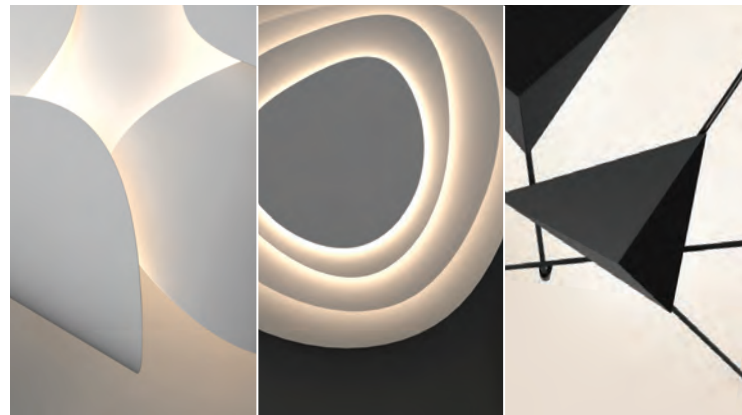

We've greatly expanded our decorative architectural lighting systems. Comprised of modular elements or individual LED lighting sculptures, they have the capability to be interconnected or used in multiples to form scalable works of art with limitless expansion – providing stunning design and world-class illumination to commercial, hospitality, and residential spaces.

| Page 10

sculptural

Sculptural is a modern style of free-flowing forms that connect functionality with sculptural expression in an original style. Contrasting to the sharp edges and solid geometry of modernism, Sculpturalism acclaims a soft, sensuous, and fluid continuity of shape and form.

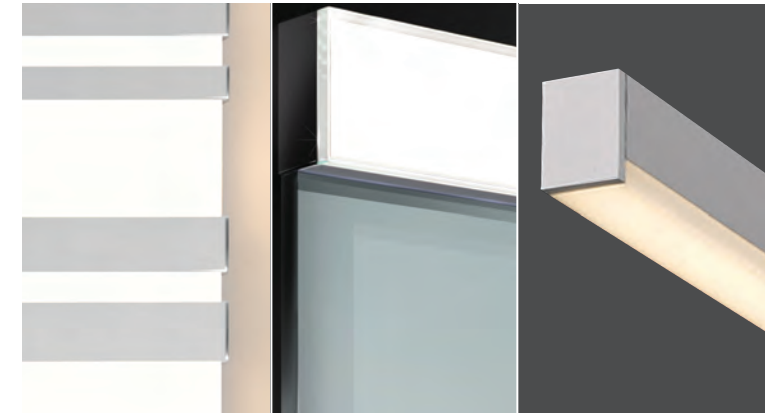

| Page 86

bath

Ranging from sleek and minimal to bold and expressive modern designs, our collections of bath bars and sconces bring generous, pristine LED illumination and decorative interest to a luxurious setting.

| Page 294

architectural

Architectural is a modern style that refers to minimal, functional, geometric designs as expressions of modern architectural applications.

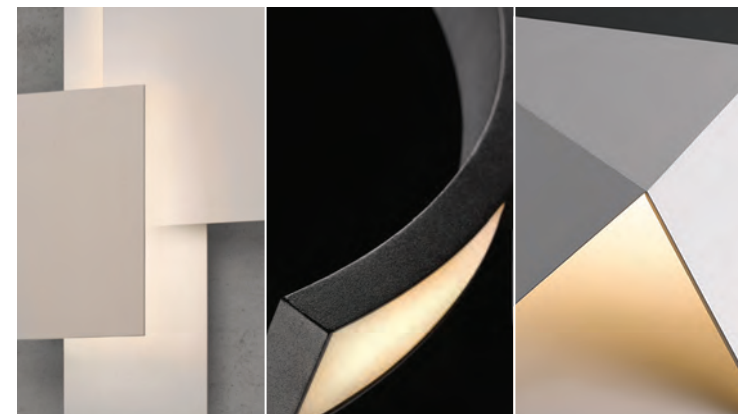

| Page 124

inside-out®

Our Inside-Out collection relates to the architectural notion of connecting the interior to the exterior of a space with beautifully executed forms of sculptural presence and simplicity that are equally at home inside or out.

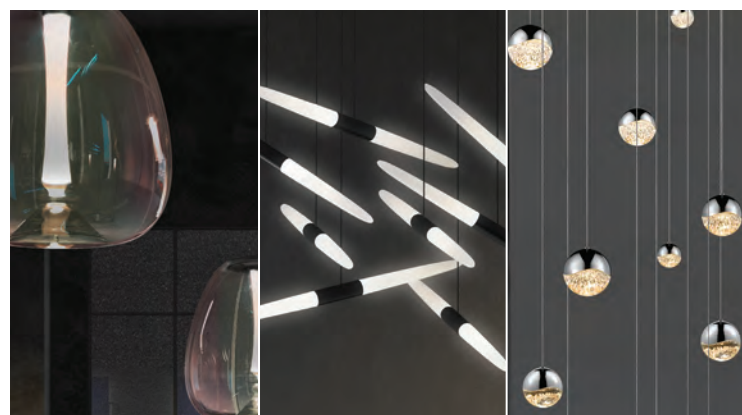

| Page 338

multi-forms

Multi-forms are lighting compositions of multiple elements often composed of abstract or geometrically shaped glass or metal pendants of singular or multiple sizes. Created to be used in a variety of configurations, Multi-form configurations create scalable, dazzling, luminous arrangements of exquisite variety, shapes, and sizes.

| Page 244

contemporary classics

Contemporary Classics represent the evolutionary pre-technology stages of Modernism from Bauhaus to Mid-Century to Post Modernism. Contemporary Classics refer to an eclectic approach to developing modern design from historical and culturally diverse inspirational references. Most notable is the decorative arts movement of the 20th century and the Post Modernism architecture of the mid-to late 1980s.

| Page 412

intervals®

Intervals is a uniquely integrated linear architectural lighting system of rhythmically-aligned bidirectional illumination, with a range of available decorative and functional trims. Architecturally scaled, the suspended horizontal beams span long lengths within a space, supported from ceiling-mounted cables or stems and forming a dramatically powerful approach to illuminating architecturally expansive locations.
| Page 26

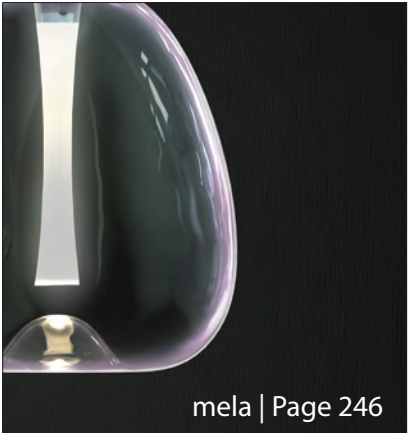

intervals | Page 26

ballet™

Poised in opposing positions, softly tapered acrylic forms radiate LED illumination. Asymmetrically counterbalanced, these double-tapered elements are arranged in a symmetrical cluster to form a dazzling luminous dance of interactivity. Suspended from a single multi-arm canopy or mounted individually to the ceiling in a radial pattern allows for scaling of the diameter of the fixture.
| Page 264

ballet | Page 264

mela | Page 246

leaf | Page 118

calla | Page 119

mela™

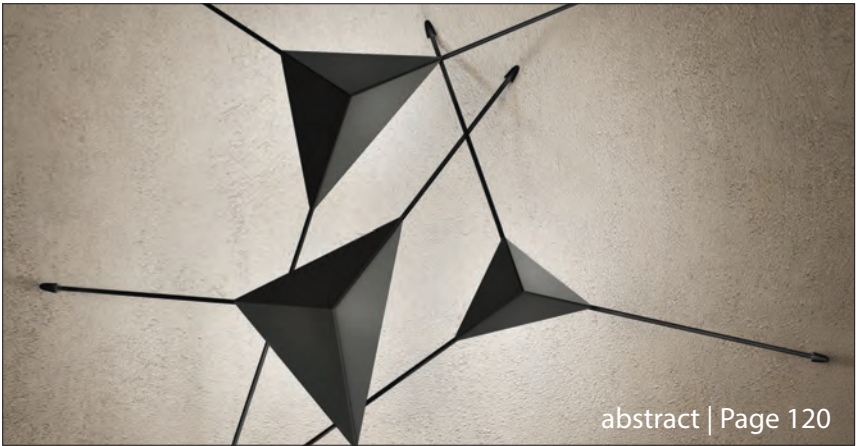

Mela is an apple-like shape of softly-dichroic, blown glass that surrounds a luminous LED core of white etched acrylic.
| Page 246

calla™

Calla radiates a soft luminous glow through its translucent petal-like shades.
| Page 119

abstract™

Indirect LED illumination is reflected on a wall or ceiling from a prism-shaped reflector that hovers over the surface on thin rods extended in tension from each of the three triangular corners. Reflectors are available in three sizes and can be arranged into a unique, abstract surface sculpture of illumination.
| Page 120

abstract | Page 120

NEW 2019

We continue to pursue our passion for creating superb illumination. Design is a continuum, a continuity of discovery driven by innovation, technology, and a compelling desire to grow and evolve. We have embraced the modern experience of architecture, design, and technology to move our investigation towards our ever-expanding curiosity in our relentless pursuit of what's next.

ola™

Ola is a softly flowing modular system of linear elements that can be suspended individually or connected in multiple arrangements.
| Page 14

light chimes™

Slender cylindrical forms, in two lengths suspended at varying heights, reveal their LED illuminated, white etched acrylic lenses in dramatically elegant and minimal configurations.
| Page 232

constellation® - aquarius

Aquarius is "The Great One," it is a broad constellation of uniform brightness across a vast space of sky. Expansive, covering a large range of space, Aquarius is the latest innovative design configuration of our Constellation architectural lighting system.
| Page 58

suspenders®

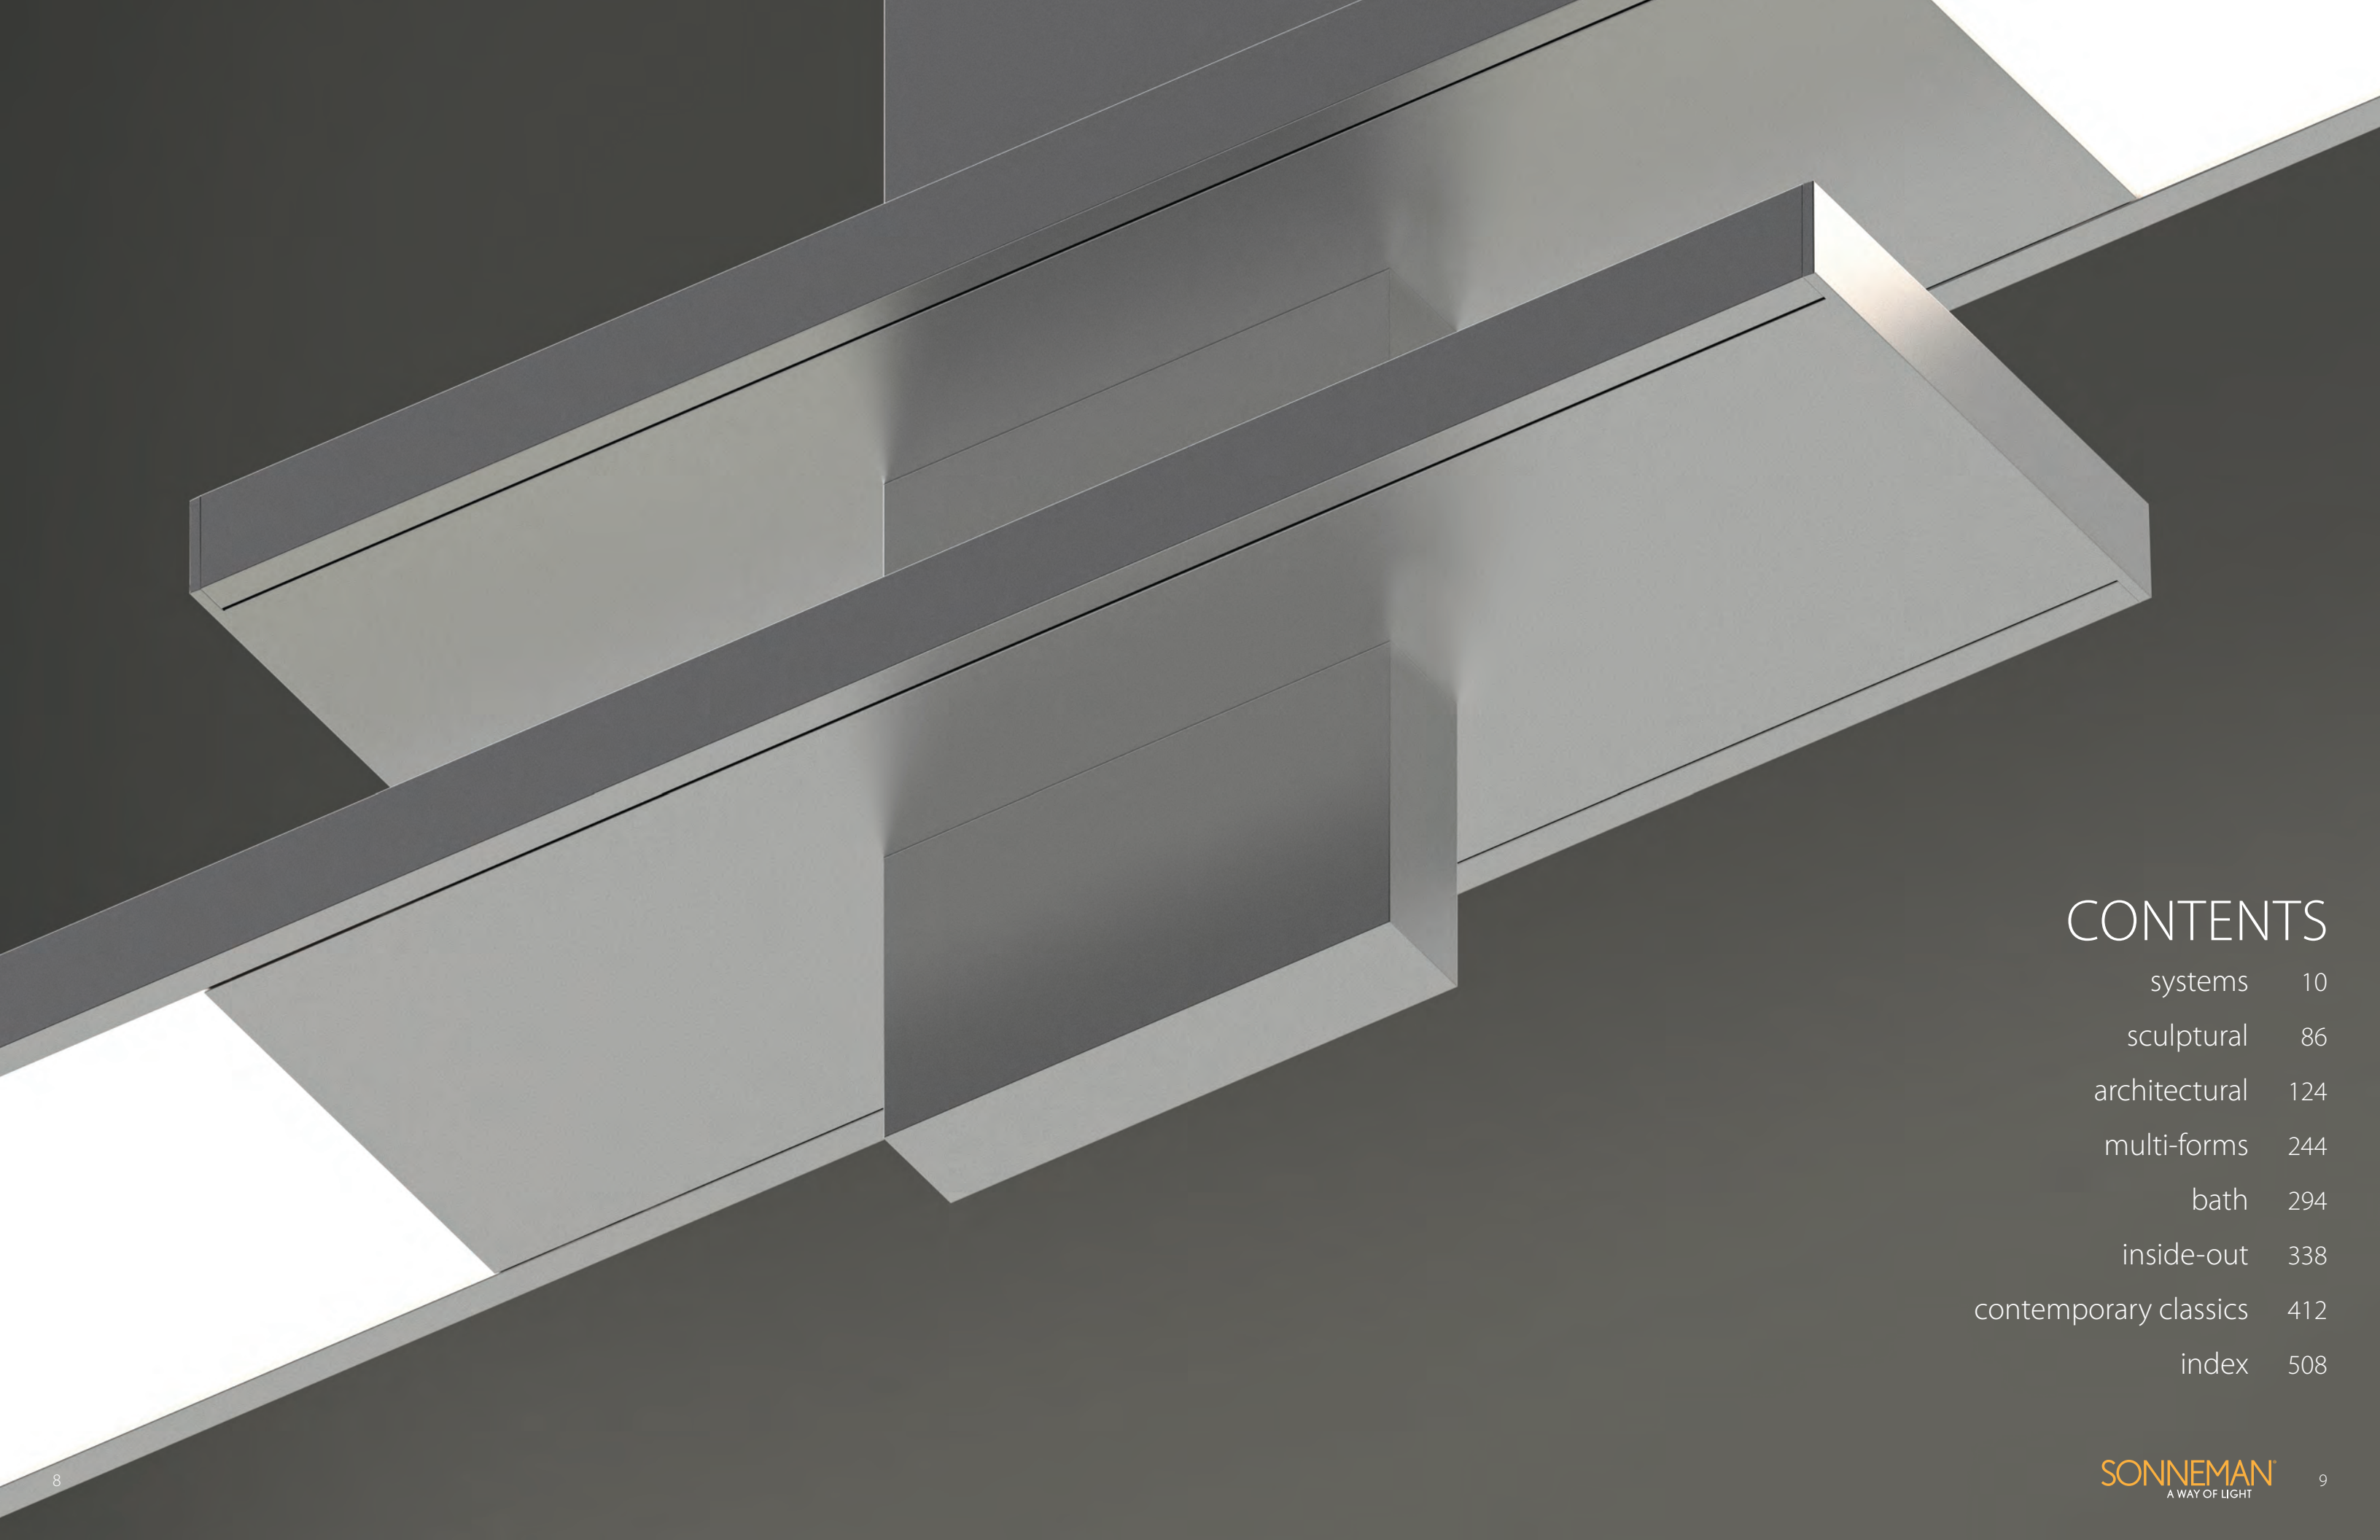

We have expanded our Suspenders system with numerous new decorative and functional components, including 44 Luminaires and 7 Power Bar arrangements. Explore our Suspenders Catalog, Volume 5.

glide™

A flared "V"-shaped linear form, with a continuous radius end, defines a minimal profile directing light bidirectionally. Precisely sophisticated, Glide's modern sleekness is designed to provide balanced LED illumination along a linear situation for both general and task applications.
| Page 152

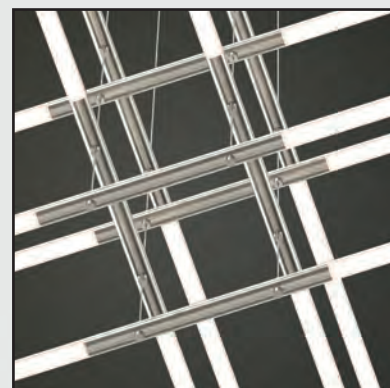

leaf™

Reminiscent of a freshly-grown stem with two leaves, Leaf offers a bold yet organic feel to a space. Soft LED illumination is reflected onto the wall from leaf-like shades, producing a warm radiant glow.

systems

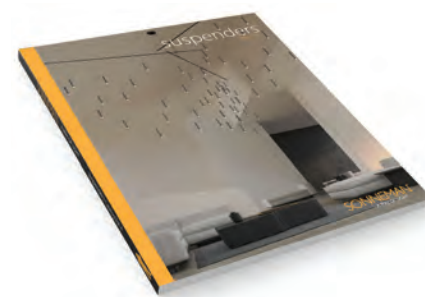

Thoughtfully scaled, modular systems of interconnected elements and LED luminaires, created by ingenuity, technology, and a systems approach to design.

Our decorative architectural systems have been meticulously designed as individual LED lighting sculptures with the capability to be interconnected into scalable works of art, with limitless expansion across the vastness of a space.

suspenders® is...

A delicately scaled, modular system of interconnected elements and suspended LED luminaires. Suspenders can be configured and customized as individual lighting sculptures or as a tiered web of infinite scope and variety. The Suspenders system harmoniously integrates functional and decorative luminaires, providing the ability to add focused light or the soft glow of indirect illumination to any application.

See our **NEW SUSPENDERS CATALOG** with our 2019 introductions, or visit our **website** for product line information and details.

ola™
TRI-STAR

Ola's softly-flowing, luminous elements are shown here in suspension, joined with the 120-degree connector at the center of the Tri-Star configuration.

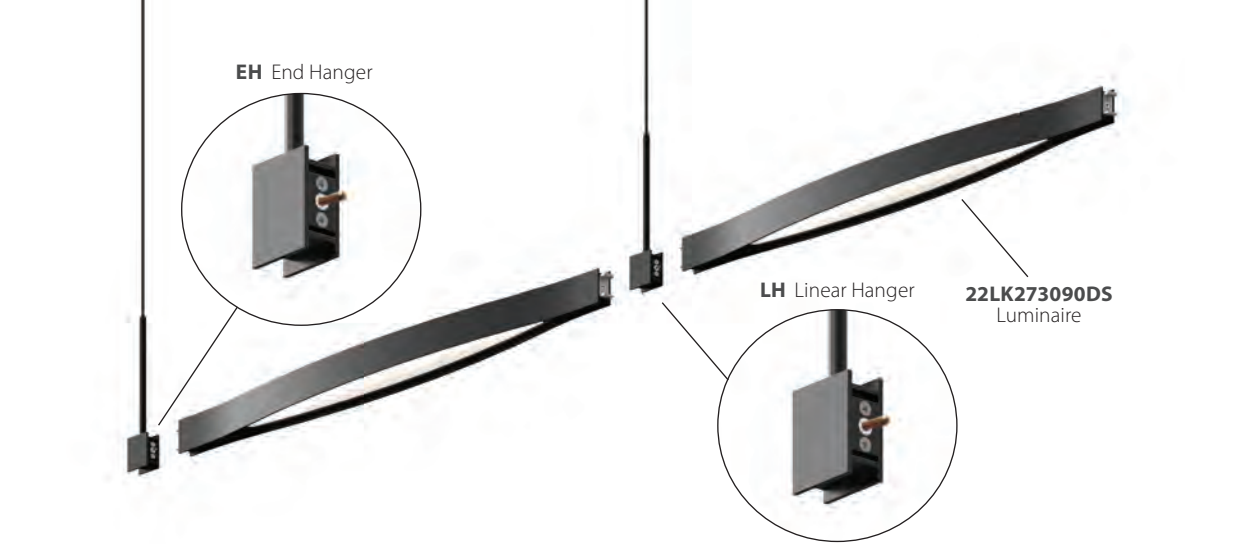

ola™

Ola's delicately-bowed LED luminaires can be suspended in multiple configurations of one, two, three, or more connected luminaires. Additionally, an infinite variety of hexagon, honeycomb, and abstract configurations can form incredibly interesting and scalable webs of flowing illumination across a plane of larger space. The downward direction of the LED illumination, through the optical acrylic diffusers, provides distributed illumination when suspended high within a space or directed task illumination when suspended low over a work surface.

How to Order, p.24 - 25

Ola is a modular system composed of Connectors, Luminaires, and Power Feeds. To build a configuration, specify: the desired number of Luminaires (22Lx273090DS); the appropriate Connector styles—End Hanger, Linear Hanger, Angle Hanger, or Y Hanger—with the Connector below the desired Power Feed location specified as a Power Cord Suspension Type; and an appropriate Power Feed based on the total number of luminaires and installation condition.

STRAIGHT CONNECTORS

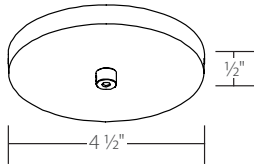

GEOMETRIC CONNECTORS

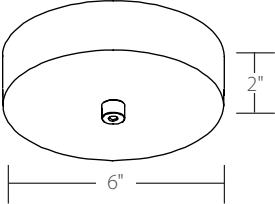

POWER FEED STYLES

For Remote or Outlet Box Driver Location

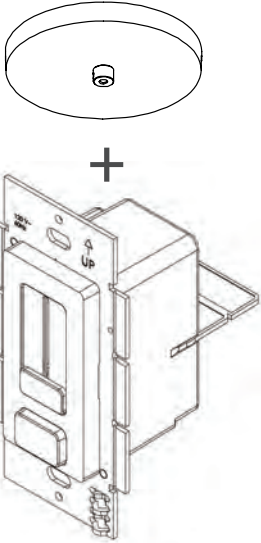

For Canopy Driver Location

For Switch Driver Location

Ola requires a 24V constant voltage LED driver between the line voltage circuit and the Power Feed of the system. The driver is typically installed either in the outlet box above the Power Feed, in the Power Feed canopy, or in a remote and accessible location. For installations where these options are not desired or feasible, we offer a special wall dimmer switch with a built-in LED driver, which replaces your existing wall switch; no special wiring is required beyond the existing two wires between the switch and the outlet box. Available in 60W and 100W versions, and includes interchangeable face plates in three finishes: Gloss White, Gloss Light Almond, and Gloss Brown.

Wall Dimmer Switch with Built-in 24V LED Driver

OLA™ SPECIFICATIONS: how to order

Specify your Ola System by building the item numbers for your Luminaires, Connectors, and Power Feeds using the tables below, selecting from left to right the desired option from each column. Or for simplified ordering, select one of our Preconfigured Quick Spec styles from the table below or on the following page.

intervals®

A LINEAR SYSTEM

By planning with a combination of Linear, Corner, T, and X Connectors, Intervals can follow the architectural contours of a space. Here, blending Fixed Downlights with suspended Cylinder Pendant Light Engines over the workstations provides visual interest and lighting utility.

Shown: Round Bezel Uplight Trims (A) with Etched Ring (GA) and Etched Cylinder Downlight Trims (C), on Fixed Downlight (1) and Cylinder Pendant (3) Light Engines. See Intervals system trims and light engine components p.46-47

Shown: Etched Cylinder Uplight Trims (C) with Round Snoot (DA) and Round Bezel Downlight Trims (A), on Fixed Downlight (1) and Round Aimable (2) Light Engines.

Intervals offers multiple Light Engine options, allowing multiple application-specific functions to be met on the same Beam. Here, low-glare Round Snoots (DA) are mounted to Fixed Downlights (1), with Round Aimable (2) Light Engines added to highlight artwork and other areas of interest.

Round Aimable (2) w/Round Aimable (A)

Fixed Downlight (1) w/Round Snoot (DA)

intervals®

A LINEAR SYSTEM

Intervals can be specified without the Uplight component, for an ultra-low-profile Linear Downlighting solution. Shown here with Square Bezel Downlight Trims **(FA)** on Satin Black Beams with 24" pitch spacing, hung from field-cuttable Stem Suspension Kits.

STANDARD CONFIGURATION CODES

20PK0824-12NHSD3090-XX1WFA (Quantity 2)
20CKEH040 (Quantity 1)
20CKEH041 (Quantity 1)
20CKLH040 (Quantity 1)

Intervals Square Bezel Downlight Trim **(FA)** makes a crisp, geometric statement with its die-cast aluminum construction that mirrors the rectangular precision of the Beam.

Shown: Clear w/Cube Uplight Trim **(FB)** and Square Wall Washer Downlight Trim **(FE)**, on Satin Black Beams with 24" pitch spacing. Suggested alternative square trim configurations are shown below.

SQUARE TRIM OPTIONS:

Clear w/Cube **(FB)**

Etched Cube **(FC)**

Square Bezel **(FA)**

Square Bezel **(FA)**

Square Bezel **(FA)**

Square Snoot **(FD)**

FE
Square Wall Washer

Intervals Wall Washer Trims provide bright, even wall washing from Beams suspended near a wall. By combining a technologically advanced hybrid lens, micro-lens film, and high-efficiency reflector, Intervals Wall Washers eliminate scalloping and back-light glare, and feature a soft cutoff above the Beam. Available in Square **(FE)** and Round Trim **(EA)** options, with both forms adjustable for precise aiming and alignment.

The Intervals system is available with a wide range of decorative and functional trims and light engines. Each Intervals Beam can be specified with any one of the Uplight Trims and up to five Downlight Trims allowing Intervals to be configured to meet an infinite range of lighting needs and decorative styles.

UPLIGHT TRIM OPTIONS:

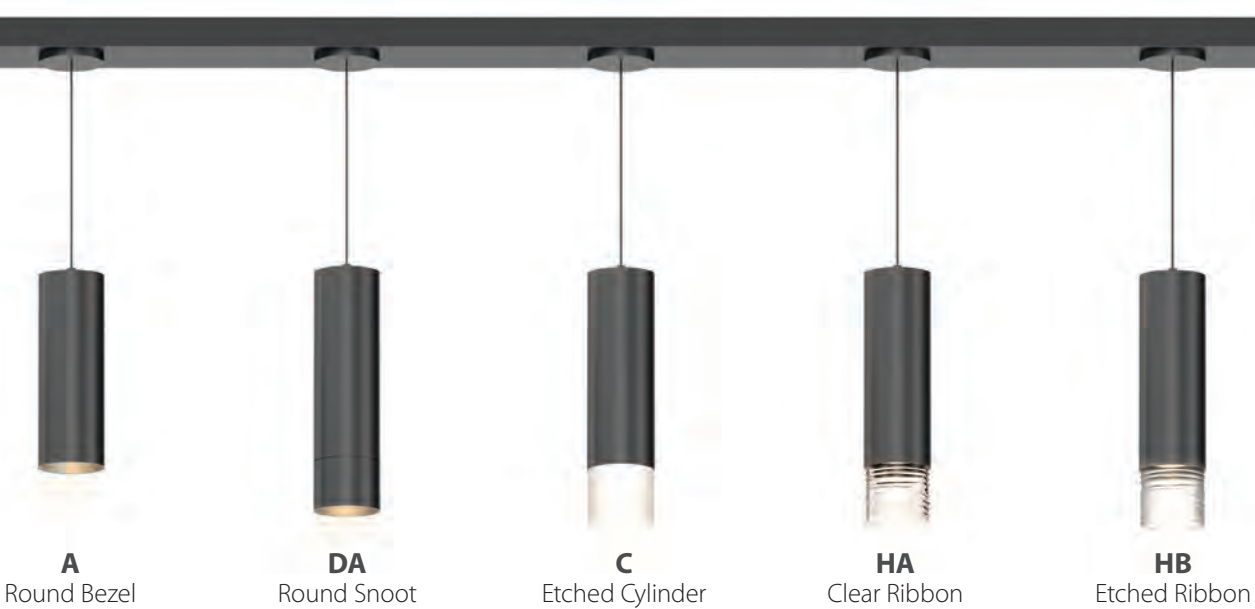

DOWNLIGHT TRIM OPTIONS:

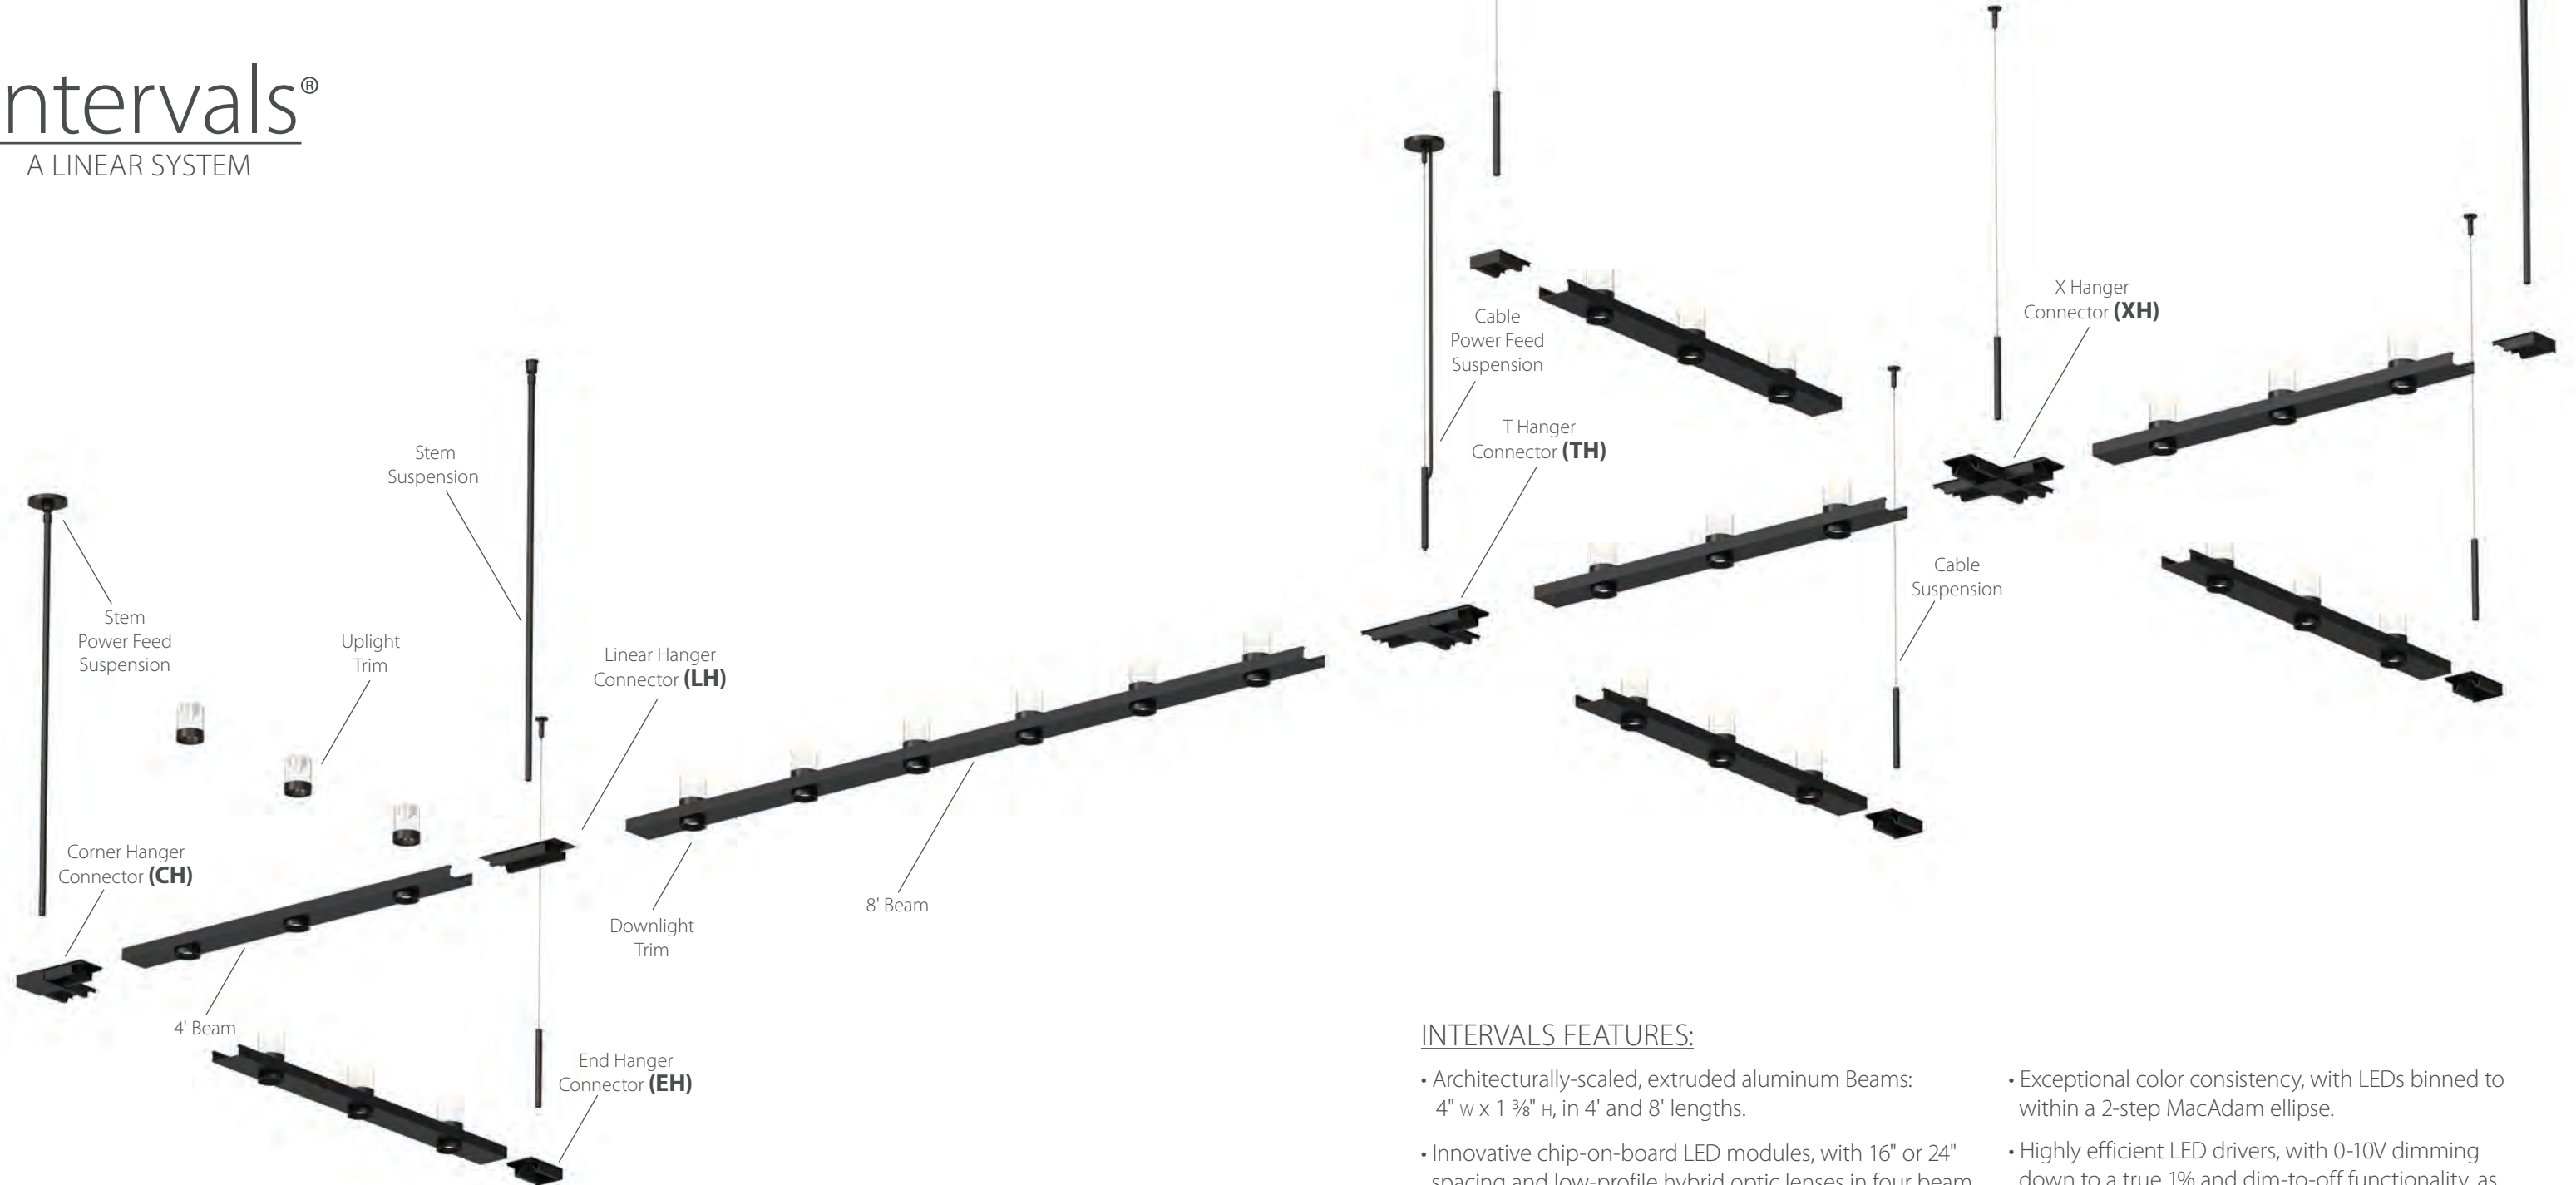

LARGE GLASS, SNOOTS AND REFLECTORS

CYLINDER PENDANT TRIMS

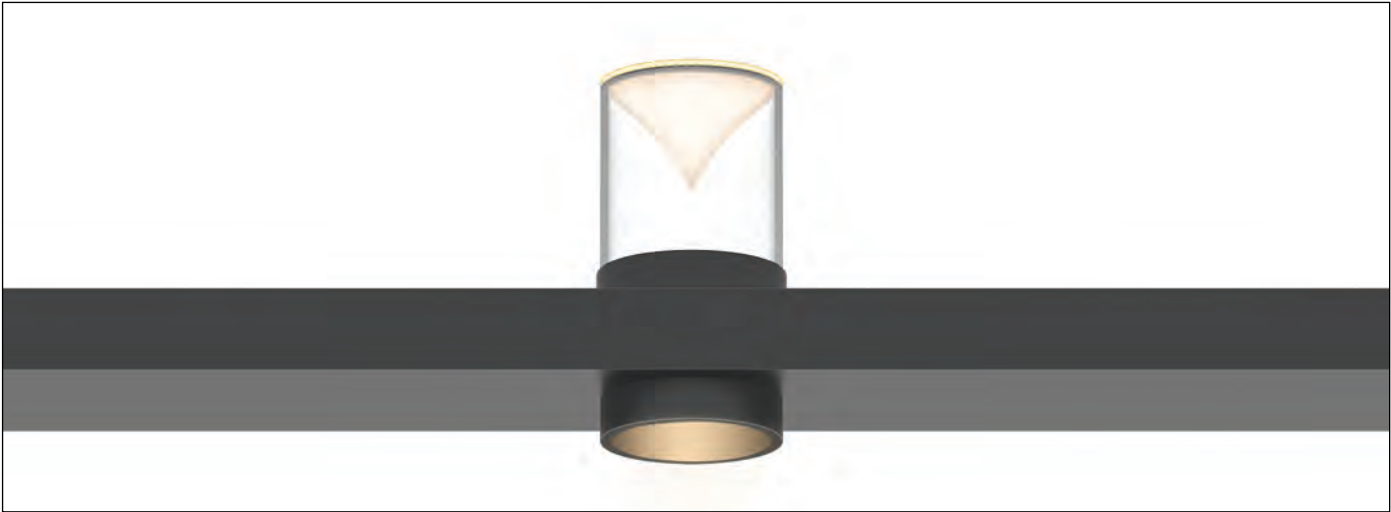

An Intervals system is composed of Linear Beams and multiple Connectors. Any combination of 4' and 8' Beam lengths can be used with any of five Hanger Connector options to create linear, rectangular, perpendicular, and grid configurations that define the volume and utility of a space. For details on how to order Intervals, see p.54-55. For custom configurations, contact our Contract Sales Team at contract@sonneman.com.

INTERVALS FEATURES:

- Architecturally-scaled, extruded aluminum Beams: 4" w x 1 3/8" H, in 4' and 8' lengths.
- Innovative chip-on-board LED modules, with 16" or 24" spacing and low-profile hybrid optic lenses in four beam spread options.
- Can be configured for independent control of uplight and downlight channels by using two Power Feed locations.
- Two light output options for each channel: Standard output (4W, 500 Lumens per LED) and High output (8W, 1000 Lumens per LED).
- Three Downlight Light Engine options, which can be mixed on a single Beam: Fixed, Round Aimable, and Cylinder Pendant. Each beam can be configured with or without the Uplight Light Engine.
- Exceptional color consistency, with LEDs binned to within a 2-step MacAdam ellipse.
- Highly efficient LED drivers, with 0-10V dimming down to a true 1% and dim-to-off functionality, as well as incandescent and ELV dimming compatibility at 120VAC.
- Cable and stem suspension mounting options; can be field cut and are suitable for sloped ceiling applications.
- Five Connector options: Linear, Corner, T, X, and End Hangers.
- Multiple decorative and functional trim options.

(also available with Uplight)

BEAM SPREAD OPTIONS:

INTERVALS® SPECIFICATIONS: how to order

The Intervals system consists of interconnected Beams, supported by a Connector at each end. Linear, Corner, T, and X Hangers connect multiple Beams to each other. End Hangers close the end of a Beam. For single channel control, only a single Power Feed is required. For independently-controllable uplight and downlight channels, two of the Connectors in the system must be specified as Power Feeds.

INTERVALS BEAM LENGTHS & PITCH OPTIONS

PRECONFIGURED QUICK SPEC ORDERING

For simplified ordering, choose from our preconfigured Quick Spec table, where you only need to specify your desired finish, style/size and upper trim; the remaining options have been preselected according to our recommendations.

Family	Category	Finish	Style/Size	Uplight Trim
20 Intervals	Q Quick Spec	K Satin Black W Satin White	L04 4' Linear	B Clear w/Cone
			L08 8' Linear	C Etched Cylinder
			S04 4' Square	
			R48 4' x 8' Rectangle	
			Z46 4' x 16' Zig Zag	
Example Quick Spec Item Number:				
20QKL04B				
Preconfigured Collection fixtures, p.50 -51				

Preselected Options	
LED Pitch	16" on Center
Input Voltage	120-277V
Uplight Output	Standard
Downlight Output	High
Dimming	Phase at 120VAC and 0-10V
CCT	3000K
CRI	90
Downlight Lens	35° Wide Spot
Suspension Type	6' Cable
Single Channel Control (One Power Feed)	

INTERVALS® SPECIFICATIONS: how to order

Specify your Intervals system by building the item numbers for your Beams and Connectors as shown below, selecting left to right the desired option from each column.

STANDARD ORDERING

Family	Category	Finish	Length	LED Pitch	Input Voltage	Uplight Output	Downlight Output	Driver Dimming	CCT

¹Phase dimming at 120VAC
²Only available in 80 CRI
³Only available in 2200 CCT
⁴Lens included, select "X" for Uplight Lens
⁵Only available for Fixed and Cylinder Pendant Downlight Types. 55° Flood Lens not available for Cylinder Pendant with this Trim.
⁶Lens included, select "X" for Downlight Lens
⁷Only available for Fixed Downlight Type
⁸Can be field-cut. Suitable for 45° sloped ceilings

constellation[®]

live among the stars...

with the celestial imagery and sculptural drama of Constellation, a system of architecturally scalable, interconnected compositions of dazzling sculptural illumination.

constellation®

live among the stars

AQUARIUS

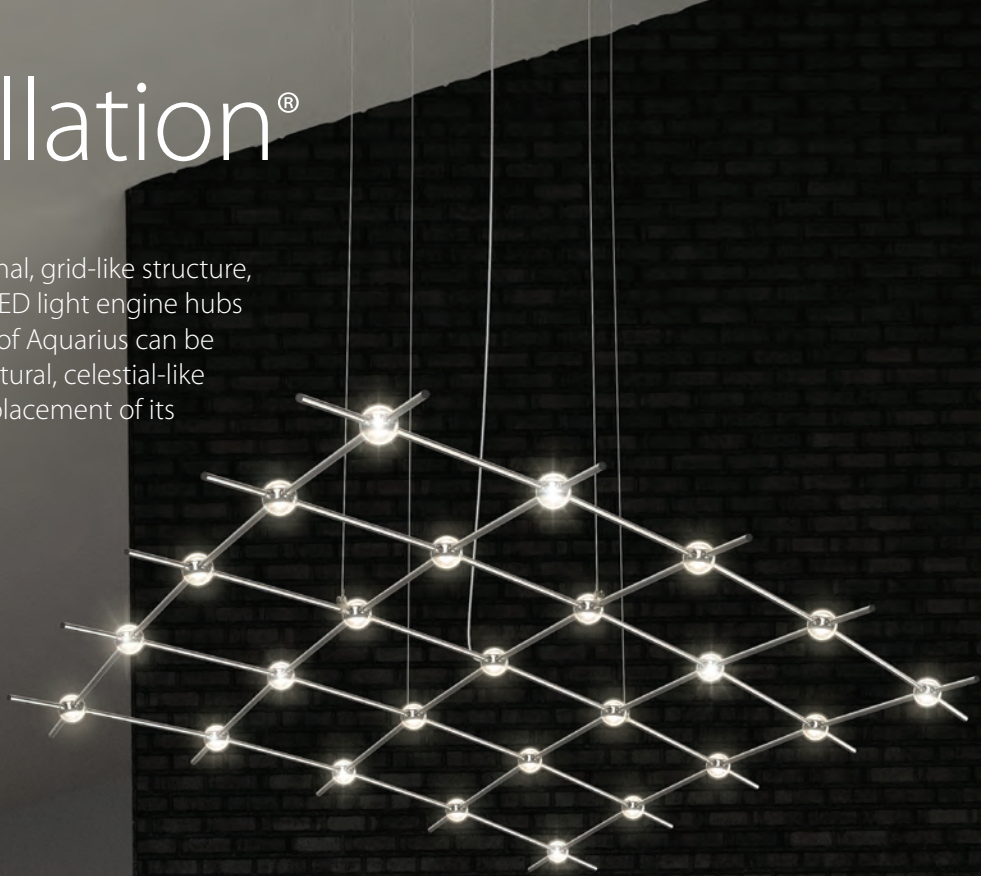

Aquarius is "The Great One;" it is a broad constellation of uniform brightness across a vast space of sky. Expansive, covering a large range of space, Aquarius is the latest innovative design configuration of our Constellation architectural lighting system.

21Q13-RW7712

constellation®

AQUARIUS

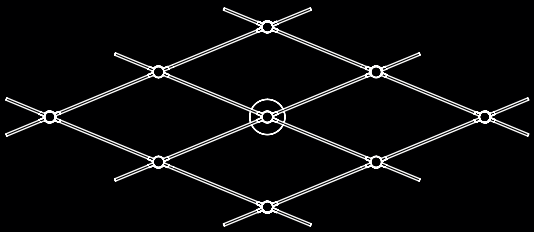

A stunning, two-dimensional, grid-like structure, Aquarius is comprised of LED light engine hubs and connectors. The span of Aquarius can be suspended to take on a natural, celestial-like curve, depending on the placement of its ceiling hangers.

White Optical Acrylic Lens

CONSTELLATION SYSTEM DETAILS

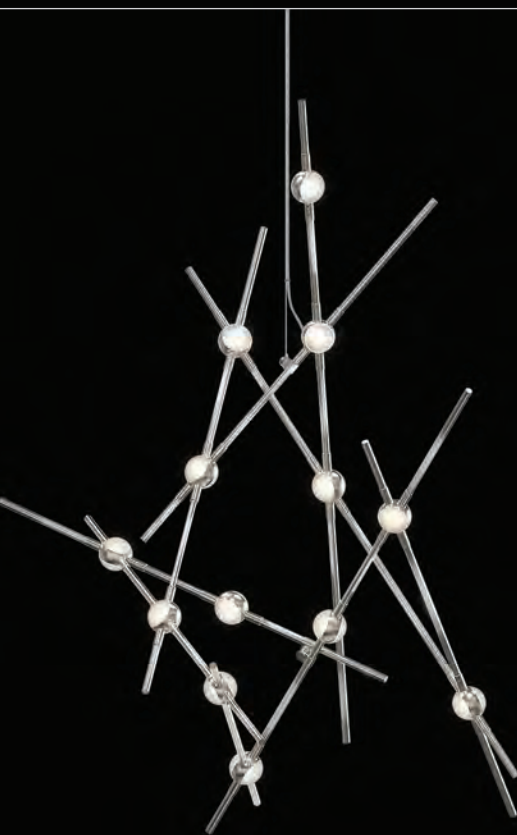

A Constellation configuration is built from LED hubs, connecting arms, and cable ceiling hangers, shown above. Shown left is a close-up of the Constellation hubs and the two available lens options: illumination radiates through either white optical acrylic lenses, or sparkles with refracted light through micro-faceted clear acrylic crystal lenses. Each hub is a complete LED light engine, using an array of LEDs with driver circuitry on each of the two faces of the hub. The connecting arms form a structural and electrical connection between the hubs, and are easily assembled by inserting the arm into the hub and are secured in place by a retaining set screw. The hubs can revolve around the connecting arms to alter the orientation of the illumination and that of the intersecting connecting arms. The configuration is supported by cable ceiling hangers that snap onto an arm and lock into place as needed, and is powered by a special power feed hub connected to the ceiling power feed.

tik-tak®

STACK

LED rods are suspended in tandem pairs on multiple levels, perpendicular to each other. Each rod can be independently positioned as up or down light, and adjusted with infinite variability to any height along the suspension cables. Dramatic in the precision of their orientation and range of verticality, Tik-Tak brings a crisp presence to the volume of space.

sculptural

Sculptural is a modern style of free-flowing forms that connect functionality with sculptural expression in an original style. Contrasting to the sharp edges and solid geometry of modernism, Sculpturalism acclaims a soft, sensuous, and fluid continuity of shape and form.

waveforms®

A luminous interior surface peeks through a rhythm of undulations, revealing the light from within these dramatic LED pendants. Shaped in a deep bell or as a broader dome, these sculptural forms are available in several sizes and finishes.

abstract™

Indirect LED illumination is reflected on a wall or ceiling from a prism-shaped reflector that hovers over the surface on thin rods extended in tension from each of the three triangular corners. Reflectors are available in three sizes and can be arranged into a unique, abstract surface sculpture of illumination, with multiple fixtures connected to a single remote power supply.

2181.25-S1-M1-L1

ABSTRACT ITEM NUMBER

To install multiple Abstract fixtures on a single remote power supply, build your item number by specifying the desired quantity of each reflector size in the table below, up to 8 total fixtures. For custom configurations, contact our Contract Sales Team at contract@sonneman.com.

	Abstract SKU					Finish Options: 03. Satin White 25. Satin Black			Small Reflector Quantity: 0-8			Medium Reflector Quantity: 0-8			Large Reflector Quantity: 0-8	

abstract™

This work of modern lighting art can be composed in any configuration, imagined in multiples or singularly for dramatic and powerful architectural statements of three-dimensional art.

(Custom configuration shown)

architectural

Architectural is a modern style that refers to the application of generally minimal, functional, geometric designs as expressions of modern architectural applications.

corona ring

Corona is a circular profile of light; a warm ringed glow of LED illumination providing both the presence and the absence of volume. Corona Rings are available in a range of multiple diameters.

100-277VAC Input w/LED Driver in Canopy
Dimmable by Electronic Low Voltage (ELV) and Standard (TRIAC) Incandescent at 120VAC, or 0-10V

2318.16 Bright Satin Aluminum
2318.25 Satin Black

The image shows four double corona pendant lights hanging from a ceiling. Each light consists of two concentric, glowing yellow rings with a dark grey outer rim. The rings are suspended by thin black wires. The lights are arranged in a staggered, descending pattern from top-left to bottom-right. The background is a light grey gradient.

double corona®

Double Corona introduces bidirectional lighting symmetry to the circular profile of Corona, a Sonneman classic. The warm glow of solid cast, frosted acrylic rings radiates LED illumination in both up and down directions, combining balance with geometric perfection.

2309

Double Corona 60" LED Ring Pendant

quad-Y

Luminous bars form a symmetrical fractal pattern of intersecting Y shapes. Delicate and precise, this snowflake-like geometry casts its LED illumination evenly across a broad surface or area.

2775.03

2775

Quad-Y LED Pendant

1 1/2" H x 46 1/2" DIA

Shade: Optical Acrylic

Canopy: 4 1/2" sq w/6' Adjustable Cord

LED: 115W, 6430 Lumens

Warm White (3000K), 90 CRI

120VAC Input w/12VAC Transformer

Dimmable by Electronic Low Voltage (ELV)

2775.03 Satin White

2775.25 Satin Black

2774.03

2773.25

bi-Y

Linear illumination often ends abruptly, leaving the ends of a surface in dark shadows. Bi-Y distributes its LED illumination radially from the center of each Y intersection, casting illumination broadly along its perfectly balanced minimal profile.

2774

Bi-Y LED Pendant
 1 1/2" H x 36 3/4" W x 18" D
 Shade: Optical Acrylic
 Canopy: 4 1/2" sq w/6' Adjustable Cord
 LED: 54W, 2870 Lumens
 Warm White (3000K), 90 CRI
 120VAC Input w/12VAC Transformer in Outlet Box
 Dimmable by Electronic Low Voltage (ELV)
2774.03 Satin White
2774.25 Satin Black

Y

2773

Y LED Pendant
 1 1/2" H x 32 1/2" DIA
 Shade: Optical Acrylic
 Canopy: 4 1/2" DIA w/6' Adjustable Cord
 LED: 40W, 2000 Lumens
 Warm White (3000K), 90 CRI
 120VAC Input w/12VAC Transformer in Outlet Box
 Dimmable by Electronic Low Voltage (ELV)
2773.03 Satin White
2773.25 Satin Black

Delicate simplicity from a pure geometric expression provides radially distributed LED illumination in perfect balance around its intersecting center.

stiletto

Stiletto's ultra-sophisticated and extraordinarily precise solid acrylic is thrust through a minimally present aluminum channel, radiating perfectly even LED illumination from within.

2349

Stiletto 72" LED Pendant

1 3/4" H x 71 1/2" W x 3/4" D

thin-line®

Thin-Line wall bars are offered in a variety of lengths and finishes, and in three lighting configurations. One-sided configurations direct light in a single direction, and can be mounted in an uplight or downlight orientation. Two-sided configurations direct light both up and down. Indirect configurations, shown here, reflect light back onto the wall or mounting surface to radiate indirect illumination.

aileron®

FLAT PANEL LIGHTING SYSTEM

This slender and graceful wing-like form mounts horizontally or vertically, and can provide direct or indirect illumination by simply rotating the panel: towards the wall for ambient light, or away from the wall to illuminate a subject or surface.

2704.16

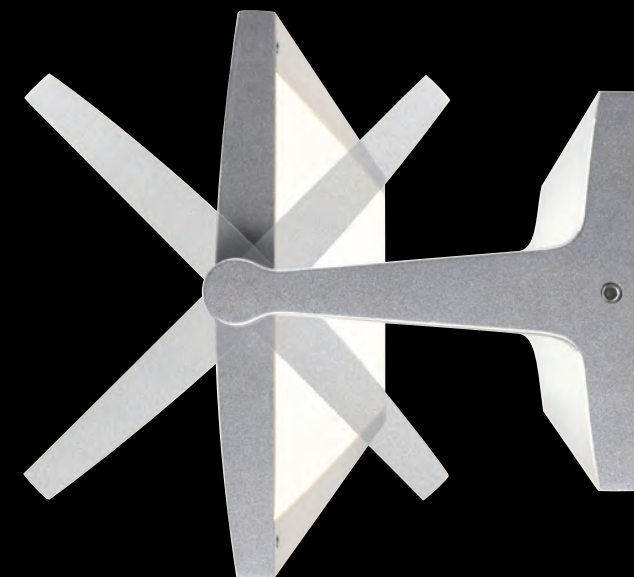

2704.16

2704.98

Shown with optional mounting rails for 4" outlet box

aileron®

FLAT PANEL LIGHTING SYSTEM

Unique to the Aileron flat panel lighting system is its revolutionary mounting system. The continuous extruded wall mount compliments the slim linear form, and mounts directly over a 2" electrical box. Optional mounting rail attachments blend smoothly into the profile and extend the height of the mounting bracket to cover a full-size outlet box anywhere along its length, as needed.

162

U.S. and foreign patents protected.

aileron®

CONTINUOUS MOUNTING RAIL SYSTEM

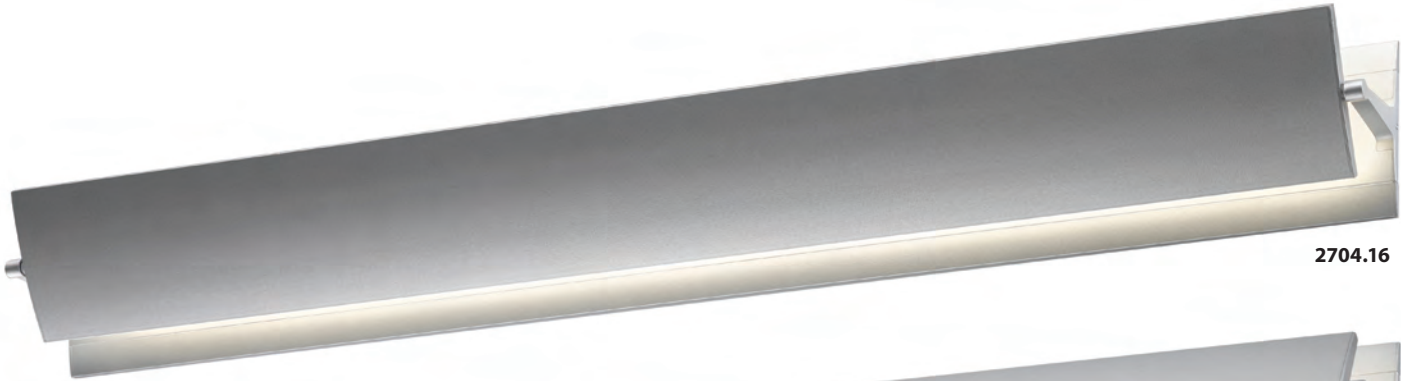

aileron®

FLAT PANEL LIGHTING SYSTEM

Ultra-bright, glare-free illumination from LED flat panel technology eliminates the hot spots and multiple shadows of conventional point source LEDs.

torus®

A precisely curved form is revolved around a center axis, forming a Torus of reflected LED luminance that appears to float in air with an open lightness. Hung high or low within a space, its delicate presence glows with a warm reflected brightness.

tromme®

Tromme reimagines the solid geometry of these classic aluminum drums, and provides visual weight with see-through lightness. LED illumination from the top edge is reflected through tapered interior acrylic diffusers, radiating an even glow of shadow-free illumination.

light guide ring

The Light Guide Ring uses an innovative system of redirected, glare-free LED illumination. The light guide transmits light from an LED source at its edge, evenly distributing the light over the face of the light guide through a precisely engineered pattern of light extraction points that provide an evenly lit, low-glare appearance, while maintaining the translucency of the optically clear acrylic disk.

counterpoint®

This mobile-like artful lighting composition achieves visual balance through the tension of varying scales and the counterpoise of dissimilar volumes around its center. Flat discs and deep cylindrical forms, of different visual weights in juxtaposition to each other, are counterbalanced on offset slender arms in a rotating system of mass. Dramatically powerful in its simplicity, Counterpoint delivers bright LED luminance downward, with a subtly lit edge from the solid acrylic lenses of its cylindrical heads.

counterpoint[®]

LINEAR

In this linear arrangement of varying scales and dissimilar volumes, cylindrical forms of different visual weights, both flat and deep, are arranged on an ultra-thin arm.

pluck®

Pluck floor and wall lamps provide unique functionality from a dramatically poised, lightly scaled silhouette. A crisp-edged, puck-like disc adjusts to desired positions, held with a magnet to a ball at the end of a thin, flexible arc.

2844.25

pluck®

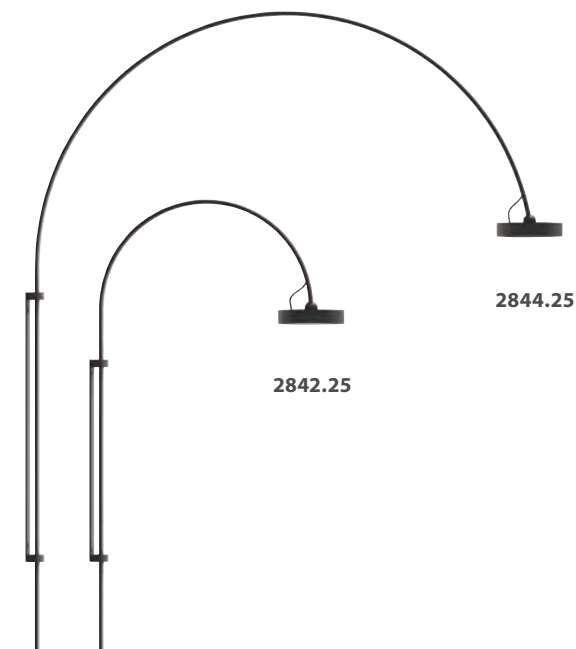

Available in two sizes, Pluck wall lamps can swing out for maximum extension or be folded against the wall. The brightness of the LED light source is adjusted by a touch of the dimmer on the puck's top surface.

2842

ARCHITECTURAL LIGHTING CYLINDERS

A classic modern architectural lighting form, Architectural Lighting Cylinders are available in a variety of sizes, configurations, and finishes, with multiple beam spread options and a number of glass and metal trims. Used singularly, in clusters, or in an aligned arrangement, ALC offers limitless possibilities to express individual style and unique creativity. The system extends through a range of configurations, including pendant, surface-, and wall-mounted fixtures in a variety of lighting and finish options.

ALC® SPECIFICATIONS: how to order

ARCHITECTURAL LIGHTING CYLINDERS

A classic modern architectural lighting form, Architectural Lighting Cylinders are available in a variety of sizes, configurations, and finishes, with multiple beam spread options and a number of glass and metal trims. Used singularly, in clusters, or in an aligned arrangement, ALC offers limitless possibilities to express individual style and unique creativity.

ALC BEAM SPREADS

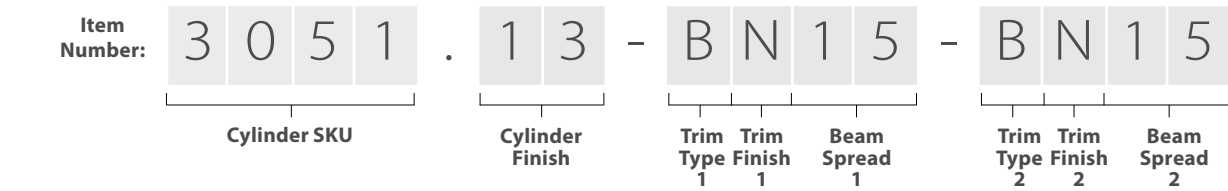

ALC® SPECIFICATIONS: how to order

The ALC system extends through a range of configurations, including pendant, surface-, and wall-mounted fixtures in a variety of lighting and finish options.

ALC ITEM NUMBER - One-Sided LED Sconces, Pendants, Surface Mounts

ALC ITEM NUMBER - Two-Sided LED Sconces

Build your item number as shown above, by selecting from left to right the desired option from each column. Note that ALC two-sided LED sconces require an additional extension as indicated. For help selecting configurations, contact our Contract Sales team at contract@sonneman.com.

multi-forms

Multi-forms are lighting compositions of multiple elements, often composed of abstract or geometrically shaped glass or metal pendants of singular or multiple sizes. Created to be used in a variety of configurations, Multi-form configurations create scalable, dazzling, luminous arrangements of exquisite variety, shapes, and sizes.

mela™

Mela is an apple-like shape of softly dichroic blown glass that surrounds a luminous LED core of white etched acrylic.

mela™

Exquisite in the subtle contours of its volume, Mela reveals the color of its surroundings within its sensual shape. Available in three sizes, as single pendants or in multiples of the same size, Mela radiates a sophisticated presence within its space.

3074

Mela 3-Light LED Pendant

2990.25C-LRG

A flask-like flat oval glass profile, suspended from a slender cable, rotates randomly to various orientations creating an asymmetric relationship to its surroundings. A single point source of LED illumination within the void of the larger glass volume creates a special aesthetic tension of scales.

liquid

Liquid pendants are available in clear, smoke fade, and poured white glass.

They can be hung individually, in multiples, or with spreaders to form larger arrangements.

liquid

The surface contours of this meteor-like glass volume have the softened look of melting glass. The visual weight of this amorphous sculpture is glorified by the thinness of the cable from which it hangs and the single point source of LED illumination within its contoured volume.

ballet™

Poised in opposing positions, softly tapered acrylic forms radiate LED illumination. Asymmetrically counterbalanced, these double-tapered elements are arranged in a symmetrical cluster to form a dazzling luminous dance of interactivity – suspending from a single multi-arm canopy or mounting individually to the ceiling, allowing for scaling of the diameter of the fixture.

(Custom configuration shown)

(Custom configuration shown)

A precisely crafted metal hemisphere with an infinity wave captures a crystal hemisphere through which LED illumination is projected.

Grown in three sizes and two finishes, Grapes offers broad variety and infinite possibilities to provide spectacular illumination to spaces from the most intimate to the most vast.

The polished chrome variety of Grapes features a faceted interior on its solid clear crystal, providing sparkling illumination that changes with the point of view.

Seen from the middle or above, the crystal appears clear with a subtle luminance. Moving below, the crystal facets become increasingly apparent, refracting the light into a dazzling radiance.

champagne bubbles

Light dances through a dazzling array of tiny bubbles within the solid mass of each glass crystal ball. A single source of LED illumination becomes refracted and diffused from within its effervescent volume. Champagne Bubbles can be hung singly or in multiple arrangements from a range of canopy sizes.

champagne bubbles

spire

Downward LED illumination shimmers through a radially-cut crystal cone, suspended from its precisely tapered form in polished chrome. Placed as single pendant drops or used in multiple arrays, the Spire-like compositions present a fresh approach to modern elegance.

PENDANT CONFIGURATIONS

trinity

A crystal prism is hand-cut in patterns that echo the acute angles and faces of its crisp, triangular form. LED illumination projects through the angular bottom facet. When hung in multiple clusters, Trinity provides a dazzling pattern of varying brightness.

bath

Ranging from sleek and minimal to bold and expressive modern designs, our collections of bath bars and sconces bring generous, pristine LED illumination and decorative interest to a luxurious setting.

bath notes

An alternating arrangement of positive and negative spaces, in a varying pattern of thick and thin, suggests a visual jazz-like rhythm. This LED bath bar brings an unexpected interest and freshness to an otherwise predictable environment.

bauhaus revisited

ROHR TALL SCONCE

Bent chrome arms support a rotating glass tube with a chrome reflector panel, providing directional LED illumination along its length. Connected by solid geometric fittings, this composition defines its functionality in the ethos of Bauhaus, echoing the enduring appeal of the soft bends of a Breuer chair.

contemporary classics

Contemporary Classics represent the evolutionary pre-technology stages of Modernism from Bauhaus to Mid-Century to Post Modernism. Contemporary Classics refers to an eclectic approach to developing modern design from historical and culturally diverse inspirational references. Most notable is the decorative arts movement of the 20th century and the Post Modernism architecture of the mid-to late 1980s.

atelier

Atelier is a contemporary style bred from the urban edge. A civilized approach to an industrial aesthetic, its distinct simplicity and expansive sculptural presence makes this pendant or sconce ideal for open spaces.

soho

The metaphor of an industrial loft reclaimed from its historical grit is refined, glorified, and transformed to the aesthetic of the ultimate urban sophistication. It is the modern art of renewal.

w/Black Shade

tuxedo

Modern elegance from classic simplicity, Tuxedo is the formality of black and white with the classic comfort of candlelight. Striking drama from the absence of adornment, Tuxedo's presence is in the strength and clarity of its silhouette.

apollo

Apollo is a reference to the gleaming mercury glass orbs of the art deco era. Inspired by the god of light, this design embodies luminous, reflective, shimmering transparency—simple, yet mysterious. Its mercury-coated glass globe reflects its outside surroundings and radiates the luminance of its clear filament lamp from within.

high line

High Line is an urban park cut from the abandoned 1860 rail line in the meat-packing district of Downtown New York. The project has integrated cultural attractions with revisionist and modern architecture that redefines the old as new again. High Line connects the historical to the modern idiom, in a rhythmic construction of structural form.

scala

Scala is a contemporary expression of architectural deco. The Chrysler Building's iconic deco geometry is experienced in the hexagon forms and in the vivid and gleaming stepped bracket and bold back plate. In ideal contrast: the soft and milky translucent beauty of the tall, handblown opal cased glass, itself a deco reference. Scala enhances a high-style message of an architecturally designed space.

7027.13F Satin Nickel

A luminous rectilinear shade floats on a crisply mitered rectangular arm, set on the minimal plane. Mitra's presence is "quietly there." It defines a high level of sophistication set against a transitional theme or in a contemporary space.

verso

Verso is pure with a delicate beauty in a simple, functional form. One slim, precise swing arm pivots at a single point and rises high to float an elongated and softly luminous linen shade. It provides ideally distributed light for reading and tasks, and a serene mood. Verso adds sophisticated punctuation to modern living spaces.

The arrangement of elements in atypical ways creates structural configurations that surprise and delight in the serendipity of their form.

3305.50

monolith

Monolith's sleek, strong column terminates by its interlocking capital detail. This connection defines the upward thrust to float in air the rectilinear volume of its linen shade. The metal finishes define the volume's serenity, balance, and simplicity, adding poise and sophistication to its space.

lina

Lina answers the need for a lamp that leans over a desk or reading area. The long stem is anchored at the heavy ring base and rises through the shade's inner rim, creating a simple form with optimized reach. A direct solution to placing light where you need it for work or reading, the Lina collection adds smart sophistication, interest, and function to your contemporary space.

OSSO

Osso speaks to the language of rotation, articulated with sleekness. The adjustability occurs by unifying the points of rotation of a round form blending seamlessly into a rectilinear arm. A metal stem rises from the base's rim, maximizing the extension of Osso's luminous drum shade to provide compelling functionality to your workspace or bedside.

quadratto

Contrasting its heavy vertical stem with the thin profile of the horizontal arm creates a bold structure of visual tension.

It supports a wide drum shade that swivels outward when light is needed over a reading area, or swings back into compact containment for a wash of ambient light.

perno

Perno is a smart study of function and counterpoised rotation achieved with weight and balance. Its two arms provide extended reach, with a counterweighted arm directing light where needed. The orbital theme of the arms is echoed by Perno's drum shade. Trim lines and refined forms make Perno a contemporary classic.

orbiter®

Among his first and most impactful designs, in 1967 Orbiter defined the modern functional art that became the cornerstone and pathos of Robert Sonneman’s life work. A simple arc supports a single boom that moves in balance throughout a hemisphere. Exhibited in museums and galleries, the Orbiter is an uncomplicated machine, so pure in its elements that the art of its simplicity has never been redefined more perfectly in the 50 years of its history.

ABOUT

ROBERT SONNEMAN

Award winning and acclaimed for clean lines and innovative approaches, Robert Sonneman, “Lighting’s Modern Master,” pioneered modern lighting in the 1960s and ’70s, making it an art form. Many of Sonneman’s sleek, functionalist lighting designs have become classics of the Modern era. Robert’s functional sensibilities and prolific design vocabulary has grown over his fifty-year career to include a unique perspective of Modernism that extends through the architectural genres and Modernist movements of the 20th and 21st centuries. His designs have been exhibited internationally in museums, galleries, and design shows over the last five decades.*

Today SONNEMAN has moved entirely to LED, electronic illuminating technology, with an extensive product line of over 2,000 products, developing over 100 new designs annually.

Integrating technology-driven design with form and function in innovative ways creates the dramatic modern design that makes... SONNEMAN – A Way of Light.

“I am curious and challenged and excited to discover the odyssey that is design. I am driven by what’s next.”

– Robert Sonneman

***Additional Background**

Robert Sonneman’s works have been exhibited in the Museum of Modern Art, New York; Cooper-Hewitt Museum, New York; the Contemporary Art Museum, Houston; the Chicago Museum of Science and Industry; the Krannert Art Museum at the University of Illinois, Urbana-Champaign; the Philadelphia Museum of Art; St. Louis Design Center; the Southwest Museum of Science and Technology; and the Saskatchewan Science Museum, Canada.

As an active contributor to design education as a guest lecturer and critic, he has served on the Advisory Boards of the Pratt School of Architecture, Parsons School of Design, and the Art Center College of Design. In addition, Robert Sonneman has participated in the Stanford Forum on Design and served on the advisory board of the Nissan Motor Corp. Sonneman is the recipient of many honors for his innovative work including the Red Dot Design Award, ASID Top Pick Award, Architizer A+ Award, NYC&G Innovation in Design Award, Best of BDNY Product Design Award, Metropolis Likes Award, Architectural Digest (AD) Great Design Award, Interior Design BOY Award, The Chicago Athenaeum’s Good Design Award, LIT Lighting Design Award, LFI Innovation Award, darc Decorative Award, and Hospitality Design (HD) Award.
